

THEJESH KAMBHALAMATAM

Full Stack Developer | React · Node.js · PostgreSQL · Gemini API

📞 +91-7993293906 ✉️ kambhalamatamthejesh@gmail.com 🔗 LinkedIn 🐙 GitHub </> LeetCode 🌐 Portfolio

SUMMARY

Backend-focused Full Stack Developer (B.Tech CSE 2027, CGPA: 7.9) with 3 shipped and deployed applications spanning AI tooling, e-commerce, and hiring systems. Proficient in Node.js/Express REST APIs, PostgreSQL data modeling, JWT/RBAC auth flows, and Google Gemini API integration. Actively solving DSA on LeetCode (82 solved — 39 Medium, 3 Hard) via Striver's A-Z. Looking to own features end-to-end in a product-driven team.

TECHNICAL SKILLS

Frontend: React.js (Hooks, Context API, Router), HTML5, CSS3, Component Architecture

Backend: Node.js, Express.js, RESTful API Design, Middleware Architecture

Database: PostgreSQL, Prisma ORM v5, Relational Schema Design, Data Modeling

Auth & Security: JWT Authentication, RBAC, bcrypt

AI Integration: Google Gemini API (gemini-2.5-flash), Prompt Engineering

Tools: Git, GitHub, Render, Vercel, Neon PostgreSQL, Postman, UptimeRobot, VS Code

Languages: JavaScript (primary), Python, Java, SQL

PROJECTS

PrepWise | React, Node.js, Express, PostgreSQL, Prisma, JWT, Gemini API | Live 🐙 GitHub

- Architected and shipped an AI-powered study platform with 3 learning modes (Descriptive, Objective, Seminar) using Google Gemini API (gemini-2.5-flash) with custom prompt engineering
- Owned the complete backend — designed REST API, JWT auth flow, session handling, and middleware layer end-to-end in Node.js/Express
- Deployed on Vercel and Render with Neon PostgreSQL and Prisma ORM v5; monitored production uptime with UptimeRobot

ShopSphere | React, Node.js, Express, PostgreSQL, Prisma, JWT, bcryptjs | Live 🐙 GitHub

- Shipped a full e-commerce product end-to-end — product listings, cart, checkout, and order management with real data flows and business logic
- Designed and implemented RBAC system with Admin and Customer roles, securing all routes via JWT and bcryptjs
- Modeled normalized relational schema in PostgreSQL with Prisma ORM v5; deployed full-stack on Render and Vercel

Talent Hiring Platform | React, Node.js, Express, PostgreSQL, Prisma, JWT, bcrypt | Live 🐙 GitHub

- Designed and built a three-role system (Candidate, Recruiter, Admin) with separate dashboards and permission layers from schema to UI
- Owned complete feature development — job posting, application tracking, and status workflows built and deployed end-to-end
- Secured all API routes with JWT middleware and bcrypt; full-stack deployed on Vercel and Render

EDUCATION

Vasireddy Venkatadri Institute of Technology (VVIT)

Bachelor of Technology in Computer Science and Engineering — CGPA: 7.9

Guntur, Andhra Pradesh

2023 – 2027

CERTIFICATIONS & ACTIVITIES

NxtWave: Python Programming (Completed), Node.js Development (Completed), SQL & Database Management (In Progress), React.js Development (In Progress)

LeetCode: 82 problems solved (39 Medium · 3 Hard) | Striver's A-Z Sheet

ACM Student Chapter: Member at VVIT — organized college-level tech events
